

Based in the timber hub of Linyi, China, Plyboost stands as a prominent plywood manufacturer with a global reach. We take pride in offering an extensive selection of top-quality wood products that cater to diverse needs and applications. Our portfolio includes veneer plywood, commercial plywood, decorative plywood, and a range of other wood-based panels such as medium-density fiberboard (MDF), embossed panels, melamine laminated plywood, wood-plastic products, modular systems, and accompanying accessories. These products have garnered significant popularity on the world stage, and we are committed to maintaining high standards of craftsmanship and affordability. We operate on the foundation of responsible sourcing and sustainability, ensuring that our products are crafted from renewable materials. Our unwavering commitment to providing premium quality and exceptional value remains a cornerstone of Plyboost's mission.

Manufacturing Process

生产流程 >>>>

Storage

- Panels should be stored horizontally in closed storehouse;
- Stack panels on the firm raised base which has enough bearers to prevent sagging;
- Prolonged storage is recommended to relieve the original strapping;
- Panels to be stored temporarily outdoors should cover with thick plastic or tarpaulins and prevent the panels to be subjected to rain, splashing or ground water.
